

## uLearn Naturally Co-operative - Lambeth

### Our Vision:

We relate to education, health and social networking in ways which can truly nurture a much valued feeling of abundance in the life of local communities. Families and their members co-operatively ease into more and more naturally unified approaches to learning and well-being, so all apparent learning barriers are gradually removed. We see that growth and progress in this way will lead to more resilient communities and socially engaged youth.

### Our Mission:

- Be a dynamic community-led learners' co-operative.
- Be a self-improving and self-sustaining organisation by constantly seeking to know better and share what really works to improve the learning of young people, families and their communities.
- Develop, establish and maintain services, meeting spaces and experiences where the learning co-operatives' vision is realised.
- Enable the highest recognition and regard of each learner's inner tutor by self, family and community in their own terms. Amongst other factors this involves respecting culture, environmental context and co-operative action.
- Carry out activities which benefit local communities and members of the learners' co-operative in regard to community engagement, family directed learning, personal and professional development.
- Raise the value and practice of life-long and cross-curricular learning; enable and enrich the learning of science and maths through the arts, intelligent play, harmony with nature and vice versa, thus sharing wholesome and best learning (pedagogical) practices.
- Network and co-operate progressively with all key local stakeholders.
- Inspire, empower and support new organisations of learners.
- Develop and maintain a broad and diversified range of highly active public engagement initiatives, fund-raising portfolios and wealth generating management strategies.
- Share the joy of being conscious learners advancing in new competencies and an unlimited range of creativity.
